WEBSITE COOKIE POLICY

Use of cookies

A cookie is a small text file which is placed onto your computer (or other electronic device) when you access our website. We use standard asp.net authentication cookies on this website to:

- recognise you whenever you visit this website (this speeds up your access to the website as you do not have to log in each time); and
- make your online experience more efficient and enjoyable.

Cookies can also be used to obtain information about your preferences, carry out research and analysis to help improve content and services and to target marketing and advertising campaigns more effectively.

In most cases the cookies we use are essential in order for us to provide you with a service you have requested (for example, so we can authenticate you when you visit our website). Where a cookie we use is not essential to provide you with access to our services, we will obtain your consent.

How to turn off cookies

If you do not want to accept cookies, you can change your browser settings so that cookies are not accepted. If you do this, please be aware that you may lose some of the functionality of this website. For further information about cookies and how to disable them please go to the Information Commissioner's webpage on cookies: <https://ico.org.uk/for-the-public/online/cookies/>.
